

NOVOHALL Rotary Sensor Touchless

RFX-6900

Heavy Duty

CANopen **Mobile Applications**

Special Features

- Very robust design for extreme environments
- Touchless hall technology
- Electrical range up to 360°, in one and multi-channel version
- 2 part design, mechanically decoupled
- Enhanced corrosion protection due to anodized aluminum housing, salt spray resistant
- Excellent linearity
- High resolution to 14 bits
- Absolutely impermeable to splash-water IP69K
- High temperature resistance
- For highest EMC requirements such as ISO pulses and interference fields according to ISO 11452 and ECE directive

Applications

- Position measurement in steering systems
- Pivotable vehicle bracings
- Transport systems with several steered axes
- Construction and agricultural machinery

The angle sensor RFX-6900 is designed for use in mobile applications under extreme environmental conditions. The sensor is suitable for a continuously ambitous operating.

The two-part design consisting of sensor and magnetic position marker offers great flexibility when mounting. The absence of shaft and bearing makes the assembly much less sensitive to axial and radial application tolerances - separate couplings are obsolete. Measurements can be made transmissively through any non-ferromagnetic material. The sensor is perfectly suitable for use in harsh environmental conditions through the completely encapsulated electronics.

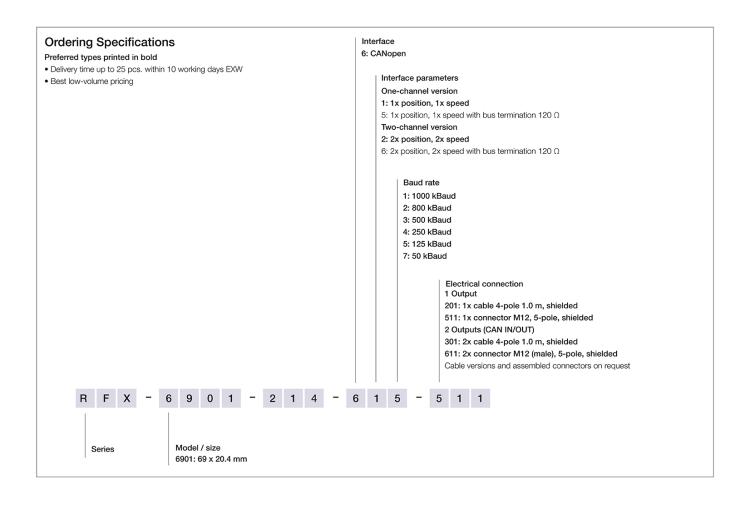

Description Material	Housing: aluminium AIMgSi1, anodized, salt spray resistant	
Mounting	With 3 screws M4, screw-in depth 7 mm min.	
Fastening torque of mounting	250 ± 50 Ncm	
Electrical connection	Cable with cable screw connection, 4x 0.5 mm ² (AWG 20), TPE, shielded / Connector M12x1, A-coded	

Mechanical Data

Dimensions	See dimension drawing
Mechanical travel	continuous
Weight	approx. 200 g

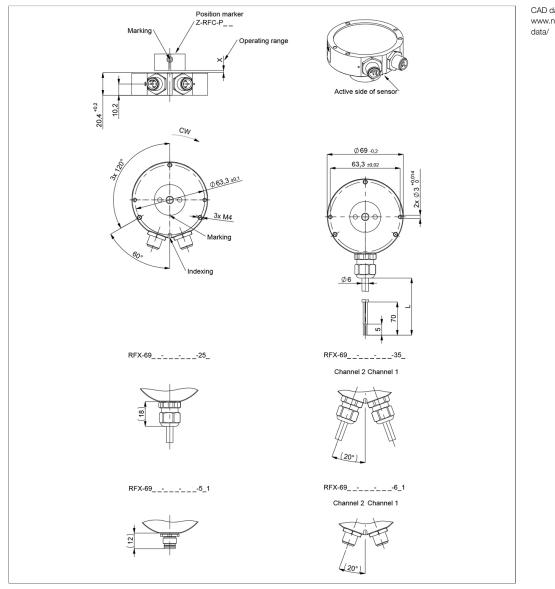

Ordering Specifications

Drawing

CAD data see www.novotechnik.de/en/download/caddata/

When the marking of the position marker is pointing towards the electrical outlet or to the indexing, the sensor output is near the electrical center position.

FS = Full scale: Signal span according to electrical measuring range

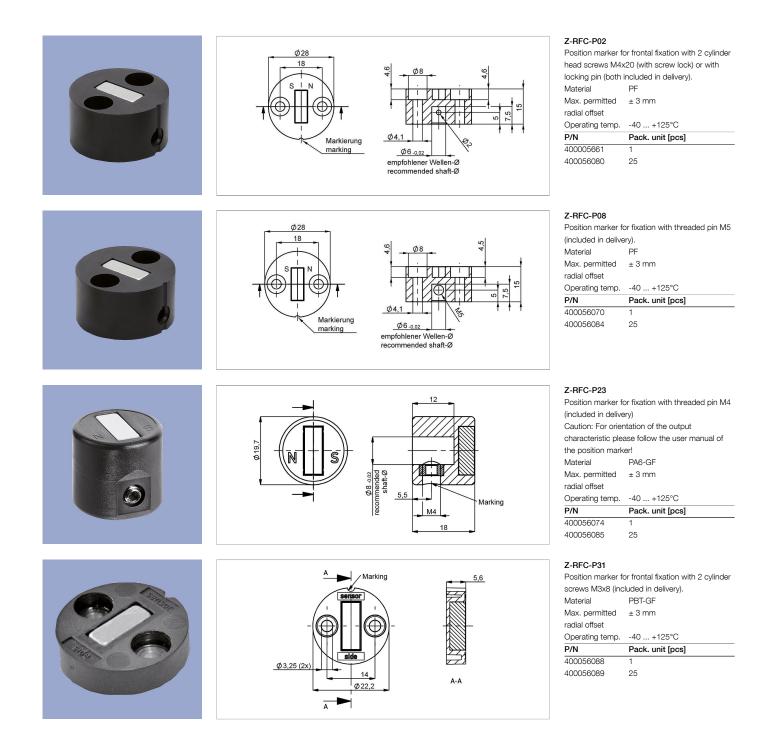

Connection Assignment

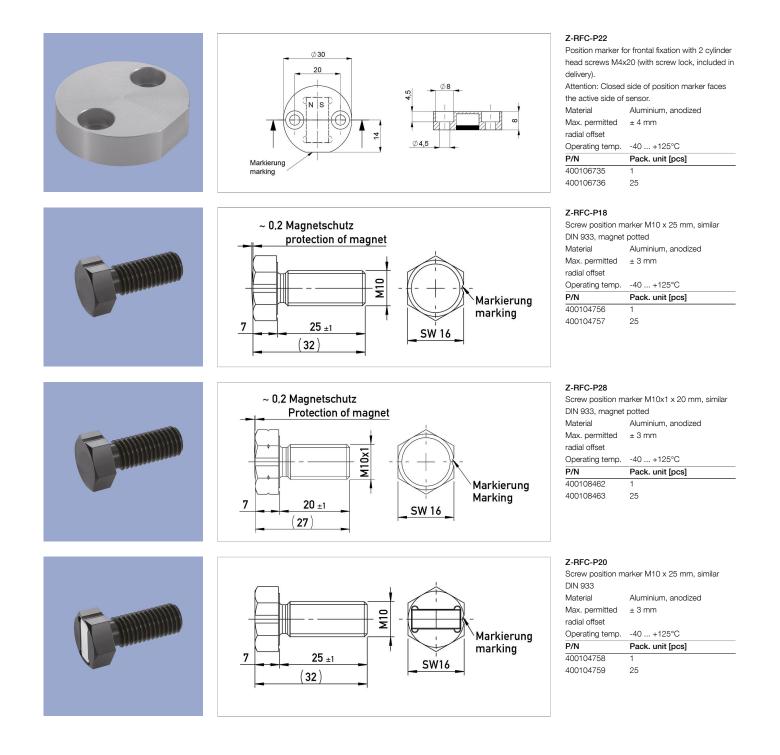

Signal	Cable	Connector
	code 2/3	code 5/6
Supply voltage Ub	BN	Pin 2
GND	WH	Pin 3
CAN_H	GN	Pin 4
CAN_L	YE	Pin 5
CAN_SHLD	Shield	Pin 1
	Connect cable shielding to GND	

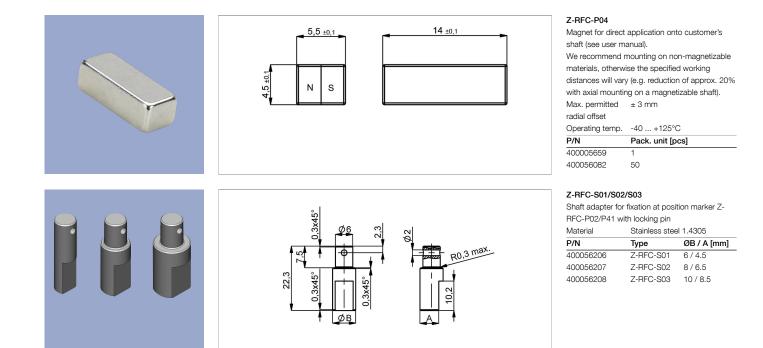

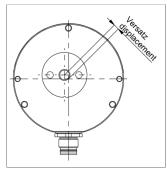

Working Distances Position Markers [mm] - Redundant Versions

Z-RFC-P02 / P04 / P08	Z-RFC-P18 / P28	Z-RFC-P22
Z-RFC-P20 / P23 / P31		
0.3 3.5	0 2.5	2.6 7.3

Lateral Magnet Offset

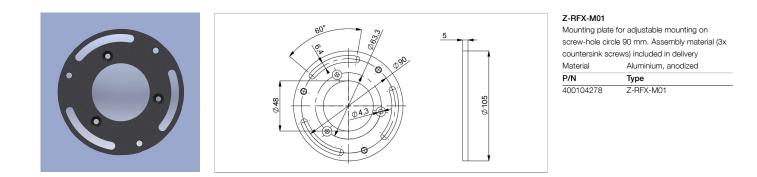

Lateral magnet offset will cause additional linearity error. The angle error, which is caused by radial displacement of sensor and position marker depends on the used position marker or magnet.

Additional Linearity Error at Radial Displacement - One-channel Versions

Z-RFC-P02 / P04 / P08	Z-RFC-P18 / P28	Z-RFC-P22	
Z-RFC-P20 / P23 / P31			
0.5 mm: ±0.4°	0.5 mm: ±0.7°	1.0 mm: ±0.8°	
1.0 mm: ±1.1°	1.0 mm: ±1.3°	2.0 mm: ±1.8°	
2.0 mm: ±3.5°	2.0 mm: ±3.3°	4.0 mm: ±5.4°	
Additional Linearity Error at Radial Displac	cement - Redundant Versions		
Additional Linearity Error at Radial Displac Z-RFC-P02 / P04 / P08	zement - Redundant Versions Z-RFC-P18 / P28	Z-RFC-P22	
Z-RFC-P02 / P04 / P08		Z-RFC-P22	
		Z-RFC-P22 1.0 mm: ±1.1°	
Z-RFC-P02 / P04 / P08 Z-RFC-P20 / P23 / P31	Z-RFC-P18 / P28

The specifications contained in our datasheets are intended solely for informational purposes. The documented specification values are based on ideal operational and environmental conditions and can vary significantly depending on the actual customer application. Using our products at or close to one or more of the specified performance ranges can lead to limitations regarding other performance parameters. It is therefore necessary that the end user verifies relevant performance parameters in the intended application. We reserve the right to change product specifications without notice.
